DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-19, 21, 23-28, 30-36, and 39-43 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Sakai et al. 5,754,361 discloses that the tension of the tape is calculated based on the rotational speeds of the two reels (e.g., 9 lines 1-11). Given a rotational speed of a reel, one of ordinary skill in the art would be able to obtain the length of tape traveling over the reel through well-established equations known in the art.

Furthermore, Okamura U.S. Patent No. 4,736,900 discloses determining a tension based on a length of tape moved. However, neither of these references, taken alone or in combination, teach "determining an unstrained length of web material added to a tension zone in a time period...and determining the tension in the web material at the end of the time period as a function of the unstrained length of web material added to the tension zone", in combination with the remaining features and elements of the claimed invention. Sakai et al. and Okamura do not disclose that the web material is "unstrained", nor do they disclose that the particular length calculated is a length "added to the tension zone".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
